

Serial No. 09/718,754  
Group Art Unit: 1638

**Listing of Claims:**

1. (Previously Presented) An isolated promoter that drives transcription in a seed-preferred manner, wherein said promoter comprises a nucleotide sequence selected from the group consisting of:
  - a) sequences natively associated with and that drive expression of DNA coding for maize Jip1 (jasmonate induced protein-1);
  - b) the nucleotide sequence set forth in SEQ ID NO: 1; and
  - c) a sequence comprising a fragment of the nucleotide sequence set forth in SEQ ID NO: 1.
2. (Previously Presented) An isolated promoter that is capable of driving transcription in a seed-preferred manner, wherein said promoter comprises a nucleotide sequence natively associated with and that drives expression of DNA coding for maize Jip1.
- 3-5. (Cancelled)
6. (Previously Presented) An isolated promoter that is capable of driving transcription in a seed-preferred manner, wherein said promoter comprises a nucleotide sequence set forth in SEQ ID NO: 1.
- 7-20 (Cancelled)
21. (Previously Presented) An expression cassette comprising a promoter and a first nucleotide sequence operably linked to the promoter, wherein the promoter initiates seed-preferred transcription of the first nucleotide sequence in a plant cell, wherein the promoter comprises a second nucleotide sequence selected from the group consisting of:

Serial No. 09/718,754  
Group Art Unit: 1638

- a) the nucleotide sequences set forth in SEQ ID NO: 1;
- b) a sequence comprising a fragment of the nucleotide sequence set forth in SEQ ID NO: 1; and
- c) a nucleotide sequence natively associated with and that drives expression of DNA coding for maize Jip1 (jasmonate-induced protein).

22-39. (Cancelled)

40. (Previously Presented) The expression cassette of claim 21, wherein the promoter comprises a nucleotide sequence natively associated with and that drives expression of DNA coding for maize Jip1 (jasmonate-induced protein).

41. (Previously Presented) The expression cassette of claim 21, wherein the promoter comprises the nucleotide sequence set forth in SEQ ID NO: 1.

42-43. (Cancelled)

44. (Previously Presented) An isolated promoter that drives transcription in a seed-preferred manner, wherein said promoter comprises a fragment of the nucleotide sequence set forth in SEQ ID NO: 1.

45. (Previously Presented) The expression cassette of claim 21, wherein the promoter comprises a fragment of the nucleotide sequence set forth in SEQ ID NO: 1.
